5 Assistant Commissioner for Patents,
Washington, D.C. 20231

Dear Sir:

This amendment is responsive to the Office Action, Paper 16, dated September 25, 2001.

10

REMARKS

Claims 1-4 are pending in the application. All of these claims were rejected under 35 U.S.C. § 103(a) as being obviated by Brueckheimer (WO 95/32596).

Applicant has provided discussion for distinguishing the present invention from Brueckheimer.

15

35 U.S.C. §103(a), Claims 1-4 Obviousness over Brueckheimer

1. Brueckheimer does not teach or suggest the structure of the invention as required by claim 1 in that it does not teach a line termination connected to a user interface thru a conversion means and an exchange termination connected to a user interface through a conversion means.

20

The Examiner, in the Office Action, has equated the elements of the present invention with Brueckheimer as follows. The Examiner indicates that the present invention's means for converting TDM cells into ATM cells is disclosed by Brueckheimer's (Fig. 2) STM backplane, egress frame memory, egress chain memory egress processor and cell assembly.
